Customised high-performance sound absorbers for a noticeable improvement in well-being and room quality. ECHOJAZZ EchoBoards® are made from recycled PET bottles. 100% Swiss design, 100% zero waste.

ACOUSTIC INSPIRATION

Ecological, robust and flexible high-performance sound absorbers made from recycled PET bottles, tailor-made for individual solutions to increase comfort and room quality in architecture, gastronomy, creative industries, open office spaces, school buildings, swimming pools, hotelery and your home. 100% Swiss design, 100% zero waste.

Made from 74 PET bottles per square metre, we process our ECHOJAZZ EchoBoards® into functional design elements. The soft, felt-like feel matches a wide range of natural materials such as stone, concrete, wood, metal and glass. ECHOJAZZ products are fire protection certified and available in up to 34 colours. Staged as a real eye-catcher or cleverly concealed - ECHOJAZZ improves the feeling of space in a noticeably pleasant way and with a lasting effect.

SUSTAINABILITY BY DESIGN

To noticeably improve well-being and room quality, we create high-performance sound absorbers for architecture, gastronomy, creative industries, open office spaces and your home. Our ready-made products are designed for you in Kriens and have the highest standards of design and simplicity.

More ecological, more robust and more flexible in use than any other comparable product: all our products are based on the use of durable high-tech felt made from 100% PET. It was our utmost goal to ensure that the ECHOJAZZ products contain the highest possible proportion of recycled PET material and that the result is deceptively close to the beauty and properties of traditional wool.

Our product is for your project: We take care of individual and tailor-made solutions that address a wide range of projects and offer a large range of smart standard products.

And after the project is before the project: Through our stewardship programme, we can recycle 100% of used ECHOJAZZ products.

ACOUSTICS AND ENVIRONMENT

At ECHOJAZZ, we combine sustainability with the simplicity of design of highest and most vanguard standards. In order not to burden our nature, only the cycle comes into question for us: recycled raw materials, recyclable products, zero waste.

From disposable plastic to high-quality end products for the design industry: for our products we use 100% PET with a minimum of 50% recycled PET. Compared to the production of virgin PET, the use of recycled PET saves up to 84% of the energy. Individual products are complemented with recycled and recyclable steel.

Closed loop: ECHOJAZZ is the only manufacturer to offer a take-back programme for all products. This means that all products can be returned for recycling at the end of their life cycle.

100% Zero Waste: We generate raw material for new products from used products and the residual material created during production.

On to the emission-free future: ECHOJAZZ products are already processed locally in Kriens, and we aim to have as many raw materials as possible manufactured as close to our site as possible.

HIGH PERFORMANCE

The world is changing at breakneck speed: space and tranquility are becoming rare commodities. Whether in a creative open office, in a simple waiting room or in trendy restaurant concepts - people should feel comfortable in all rooms. We offer solutions that improve heavily frequented and acoustically stressed rooms: noticeably, audibly, sustainably.

Design without compromise: The time of carpet wallpaper and thick curtains in dim conference rooms is over. We will contain acoustic disturbance elements in every room without restricting modern design visions and architecture.

Sustainability without compromise: The construction industry is one of the biggest waste generators on our planet. This must change. We start with a product that is 100% recyclable. We achieve the UN Sustainable Development Goals (SDGs) for responsible consumption and production.

Unlimited inspiration: It is in the hands of the creative industries to reinvent flawed materials, products and business models, to model sustainability and inspire people. Let's get started!

SOUND-ABSORBING

The open and compressed felt structure is 40% thinner than comparable high-performance absorbers.

ROBUST

Very dimensionally stable, tear-resistant and cleanable without residues.

REGULATING

Pleasant indoor climate thanks to balancing temperature and humidity.

EASY TO PROCESS

Individually cut on the CNC cutting plotter, easily customisable on site.

FIRE SAFETY

European fire protection classification: B-s1/s2, d0, hardly any smoke development and no burning dripping.

MOLD-FREE

Because the fibre does not absorb water, the EchoBoard® dries very well.

EMISSION-FREE

Does not emit hazardous fibres or paint particles.

LIGHTFASTNESS

The fibres are dyed in the liquid state and do not fade.

The robust and easy-care basic elements EchoBoard® and EchoCoustic® can be used for a large number of individual design ideas and allow creative wishes regarding shapes, colours, perforation and areas of application.

ACOUSTIC MATERIAL

ECHOBOARD®

EchoBoard® is the basic material for optimal room acoustics. All ECHOJAZZ acoustic ceilings, acoustic luminaires, acoustic walls and acoustic room dividers are produced from this absorber. It can be processed in many ways to meet ever new creations and customer requirements. The ECHOJAZZ development team is happy to help develop customised solutions according to design proposals or DWG cutting plans. There is a choice of the classic 24mm or thinner 12mm. ECHOJAZZ offers its own mounting kits for easy installation.
