Note regarding loads

All mentioned loads are indicative and based on an equal loading with standard and stable goods.

- Static: (long time) load on a flat, stable surface for an extended time
- Dynamic: short time loading when handling (movement) of the loaded pallet
- Racking: equal loading during a longer period resting on two beams, hanging free over a distance of approximately 1 meter.

FREEZER SPACERS

1200 x 800 / 1200 x 1000 mm

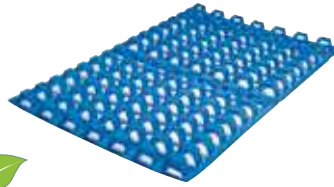

- ✓ A freezer spacer ensures maximum air penetration in freezing and tempering situations
- ✓ Easy to clean and to handle
- ✓ Nestable to save space when not being used (100 spacers = 2m³)
- ✓ HDPE - Food safe on demand
- ✓ 100% recyclable
- ✓ Open profile design allows an easy cleaning
- ✓ Air circulates rapidly through the cavities of the spacer ensuring a faster, uniform and more efficient freezing of the whole pallet load
- ✓ Economical: long lifetime, reusable many times

Mounting of the glass dividers

Example with type SEG-4002 and SEG-4003

Base divider insert (type .INF)
(Without handle shape)
Place with the crenelated side pointed down on the Euro container base.

Top divider insert (type .SUP)
(With handle shape)
Clip with the crenelated side pointed down on the handle holes.

Ready !
You can clearly see the horizontal line of the base compartment on the side. Now your glasses can safely be stored and transported.

INSULATING COVERS

Gastroplus® Protect@Line

**K-VALUE FOR POLYESTER FIBER
300G/M² = 0.90 W/M².K**

Using **insulating covers** protects temperature sensitive products or food for an extra short term and makes them less sensitive to dehydration or ventilation in temperature controlled storage thanks to the specially developed foil.

Applicable in food and non-food: domestic catering, industrial kitchens, catering, supermarkets and restaurants, logistic operators, producers and distributors of paint and varnish, pharmaceutical products, ...

All covers meet the requirements for food hygiene.

PERSONALIZATION

Printing

When purchasing plastic, reusable load carriers you can opt to have them personalized. They are usually printed with the company name, but there are diverse options:

- ✓ Numerical (telephone number, serial number, reference number, etc.)
- ✓ Logo
- ✓ Slogan
- ✓ Commercial message
- ✓ ...

The print options also vary depending on the type of product you choose and the space available to print on. However, you can assume that practically any item with an even surface will give an attractive result for personalising your container.

Hot stamping

Hot stamping uses thermal pressure in which a **series of letters** or **numbers** is transferred on to plastic using a press and hot stamping foil. Two font sizes and diverse colours are available using the hot stamping printing method (as of 25 pieces).

Hot stamping with a cliché

This type of hot stamping printing method uses a specialist cliché, produced on a one-off basis. It is suitable for applying a **specific decoration**. Otherwise the printing method is the same as the regular hot stamping option.

Screen printing (special logo/powerful message)

With screen printing the **text** or the **logo** (in up to 10 colours) is printed on the plastic using a mesh screen. As a rule the screen printing technique can be applied to any flat section of a product.

In Mould Label (IML)

In the IML printing method the desired **personalization is integrated in the mould** during the production process of the containers or pallets. You could opt to have colour added to the embossed print afterwards using hot stamping

Important information starting from 2021:

As part of an optimisation of our product database, you will find 2 order references for all products:

Example (see p. 6):

STR-2010 = new article code

(S-2001) = known article code

The **blue article code** becomes the new order reference. At the moment, you can still order on both codes.

Important information
 With our products you can find 2 order references each time:
STR-2010 = new article code
(S-2001) = known article code

INDEX

New article code (known article code)

Important information starting from 2021:

As part of an optimisation of our product database, you will find 2 order references for all products:

Example (see p. 6):

STR-2010 = new article code

(S-2001) = known article code

The **blue article code** becomes the new order reference. At the moment, you can still order on both codes.
